

中国市场寻思

能源驱动型再通胀于中国股市薪火几何？(摘要)

再通胀势头升温

高盛经济预测显示2026年中国PPI通胀率均值有望达到1%，3月份PPI数据表明长达41个月的通缩周期已告结束。这一拐点主要缘于中东石油供应冲击和“反内卷”政策的推动，很可能集中于上游工业领域。

不同通胀指标对股市影响各异

实证经验表明，PPI通胀通常伴随着可观的股市回报。整体CPI与股市回报的相关性尚无定论，但核心CPI和服务业CPI与股市回报更具正相关性。

为股市寻找通胀率的最优区间

从基本面来看，股市在经济加速或企稳、同时通胀平稳上升之时的表现最为理想。此外，温和通胀还倾向于通过降低实际收益率及提高股票相对于债券的吸引力而助推估值向上重估。

解析通胀到盈利的传导机制

通胀率上行应会支撑企业营收增长，但对利润率的影响因行业而异。我们认为，那些收入/利润率对PPI通胀具高敏感性、市场（份额）高度集中以及拥有正经营杠杆的行业（例如能源和原材料）在本轮再通胀周期中处于更有利的位置。相比之下，下游利润率受到的影响各异。

在再通胀浪潮中顺势而为

我们重申有关2026年每股盈利增速有望回升的题材观点，预计A股/港股每股盈利增速有望从去年的8%/0%（最新市场共识预测）加速至12%/12%。从板块来看，我们维持高配原材料板块，将能源板块的配置建议上调至标配，但因能源价格可能长时间居高不下而将食品饮料板块下调至低配。我们建议投资者通过瞄准上游“PPI通胀受益股”来捕捉超额收益，并在成本上涨环境当中选配“利润率具备韧性的防御型消费股”。

Reflation momentum is picking up steam

- Following 41 consecutive months of PPI deflation from Oct 2022, China is projected to transition to a moderately low/reflation cycle, with both CPI and PPI forecasts raised to 1.0% for 2026 on GS economic forecasts, driven primarily by supply-side oil shocks following the Middle East conflict and, to a lesser extent, the “anti-involution” policy bias.
- While China is a major energy importer, its effective exposure to Hormuz disruptions is mitigated by a consumption mix that is less reliant on oil and gas than global averages thanks to its ongoing energy diversification policy geographically and by input sources, alongside a domestic fuel pricing mechanism which helps alleviate the energy cost pass-through to consumer prices.
- Our economists suggest a 10% increase in oil prices raises PPI by 0.5pp over 12 months but lifts CPI by only 0.1pp, with the reflationary impact heavily concentrated in upstream industrial sectors—accounting for 80% of headline PPI gains despite having only a 30% basket weight. They expect the transmission to core CPI to remain weak at approximately 5bps for every 1% rise in PPI, subject to upside risks given the uncertainty around prolonged Hormuz disruptions.

Not all inflation proxies are created equal

- The empirical relationships between inflation indicators and Chinese equity returns have been inconclusive over time, with statistical significance varying among different inflation proxies.
- A clearer pattern emerges over a longer time frame since 2011: both onshore and offshore equities have exhibited a positive return sensitivity to movements in PPI, its sub-indices, and the PPI-CPI gap. This sensitivity is particularly critical during cost-push inflation periods—such as the current environment—where rising PPI often signals the initial stage of a reflation cycle. In fact, historical data shows that Chinese equities have consistently gained during periods of rising PPI inflation. On average, these periods last approximately 25 months, during which the MSCI China and A-shares indices have seen 41%/24% returns, respectively (图表 4).
- In contrast, headline and food CPI proxies have yielded inconclusive or negative correlations, likely due to the volatility of the underlying data series. Notably, core and services CPIs have demonstrated a slightly more positive sensitivity, suggesting a distinct, demand-driven pathway to enhance equity returns by services-led inflation.

图表 3: Overall, PPI movements, its sub-indices, the PPI-CPI gap, and to a lesser extent core/services CPI, have exhibited positive return sensitivity

Finding the inflation “sweet spot” for equities

- While extremely high or low inflation tends to be a headwind to the stock market, the likely transition from negative to low and positive inflation historically creates a favorable backdrop for Chinese equities. We group monthly performance data spanning over 30 years and found that a concurrent PPI inflation rate in the 2–4% range has generated the highest returns over 1, 3, 6, and 12-month horizons for both onshore/offshore indices, followed closely by the 0–2% range. With our economists projecting a 2026 PPI average of 1.0%, the market appears to be entering a favorable regime.
- Growth momentum is as important as, if not more important than, inflation when it comes to equity returns. Equities historically achieved the best returns when growth momentum either accelerated or stabilized alongside rising inflation, a combination that typically signifies the narrowing or stable output gaps. Growth appears to be the predominant explanatory factor particularly for A-shares, although deflation is often associated with lackluster returns even in a growth expansionary phase.
- The relationship between equity valuations and inflation appears non-linear. Heightened inflation volatility—whether a rapid spike or a sharp decline—can increase the required rate of return for risky assets, exerting upward pressure on the Cost of Equity (COE). Conversely, moderate inflation is generally conducive to valuation re-rating. From a cross-asset perspective, rising inflation often exerts downward pressure on real yields, enhancing the relative attractiveness of equities over bonds.

Dissecting the inflation-earnings transmission mechanisms

- Reflation or moderate inflation usually bode well for corporate top-line growth, with a direct positive correlation between PPI and revenue realization. The projected 0.8pp upward revision in China's nominal GDP growth (per GS estimates) following the Middle East conflict underscores a cycle shift that allows corporates—particularly in upstream sectors—to transition away from a disinflationary mindset and exercise greater pricing power.
- While the revenue outlook is broadly constructive, the impact on margins is less conclusive based on the specific inflation proxies. Historically, PPI typically drives margin expansion for upstream sectors, including Energy, Materials, Telecom, and Industrials, perhaps due to positive operating leverage. In the downstream cohorts, CPI reflation tends to support margins for consumer-facing firms, provided demand remains robust to absorb the price adjustments.
- On an aggregate level, the PPI-CPI gap usually exhibits a negative correlation with the overall corporate margins but remains positively correlated with total earnings growth (see 图表 13, and 图表 23 in Appendix). This dynamic probably reflects the dominance of the earnings boost in the upstream sector over the margin compression felt elsewhere. In fact, upstream sectors continue to command a profit pool twice the size of the consumer sectors' within the aggregate listed universe (excluding Financials and Property).
- Within the consumer cohort, the impact of rising input costs varies by sub-sectors: Consumer staples face significant margin pressure as cost indices started to rise, driven by price spikes in PET (+49% ytd), aluminum, soybean and palm oil. The impact is most pronounced for pure beverage companies compared to snacks, condiments, dairy, and pet foods. At the company level, margin resilience depends on the efficacy of input price lock-in policies and the ability to leverage brand equity to raise prices, as demonstrated by Kweichow Moutai's latest price hike action.
- As a comparison, consumer discretionary and services sectors exhibit greater resilience to cost inflation. Discretionary sub-sectors leverage from cost-plus pricing models (OEMs) or strong IP (diversified retailers) to mitigate input costs, provided end-market demand remains robust. This resilience is evidenced by the 2022 inflation cycle, where margin volatility was primarily driven by production disruptions rather than raw material costs. Services, such as restaurants and IT services (e.g. cloud), also exhibit resilience given limited direct exposure to rising oil costs.
- In general, we believe sectors or companies that: a) maintain a high correlation between revenue and PPI; b) possess the pricing power to expand margins during PPI-CPI spreads; c) show positive earnings momentum via 26E EPS revisions since the start of the Middle East conflict; and d) benefit from high market concentration (HHI) and operating leverage, are relatively better positioned to capture upside during PPI reflation cycles, all else being equal.

Riding the reflationary wave

- We reiterate our EPS growth recovery thesis for 2026 in which A/H corporate earnings growth could accelerate to 12%/12% from 8%/0% last year, underpinned by AI, “Going Global”, and China’s anti-involution policy bias, with the last driver probably already manifesting in the food delivery, logistics, autos, and select internet sub-sectors (e.g. tokens and cloud).
- To better align our strategies with the shifts in the global growth and inflation backdrop in the past month, we raise Energy to Market Weight, downgrade Food & Beverage to Underweight, but keep Materials at Overweight. The upgrade for Energy is supported by a “higher-for-longer” oil and gas price outlook; however, we acknowledge that the sector has outperformed meaningfully ytd (+21%, vs. MSCI China -5% ytd) and some of the index constituents might not be accessible to international investors, and hence the Market-weight recommendation. Conversely, we downgrade Food & Beverage to Underweight as reflating input costs create margin headwinds across the sector in general.

图表 15: We upgrade Energy to Market Weight and downgrade Food & Beverage to Underweight to adjust for the shifts in the global growth and inflation backdrop

- Investors can hedge their portfolios with “PPI Inflation Beneficiaries” within upstream sectors, where rising commodity prices enhance revenues against fixed cost bases, driving margin expansion and positive earnings revisions. To capitalize on this dynamic, we screen for a list of 20 GS Buy/Neutral-rated, commodity-related names with high sensitivity in both returns and fundamentals to PPI inflation, particularly those in Energy, Materials, Capital Goods, and (Marine) Transportation. Our recent Chinese HALO portfolio is also

designed to capture value from companies in these sectors that possess high tangible asset intensity. With “hard-to-replicate” physical assets and lower funding costs to ramp up capex, these firms are better positioned to navigate and monetize rising industrial prices.

- Despite the rising-cost headwinds facing downstream consumer sectors, we have identified a select group of GS Buy-rated “Margin-Resilient Consumption Defenders” characterized by three primary characteristics:
 - a. They are projected to maintain or expand their margins in 2026 relative to historical averages by GS analysts/consensus forecasts;
 - b. Possess high brand equity and robust intellectual property that would enable them to pass through higher costs to customers without significant volume loss; and,
 - c. They have provided guidance in recent earnings calls or management meetings regarding the limited impact of inflation on their operations or made commitments to maintaining current margin levels.

图表 18: We identified a list of GS Buy-rated names with expected stable/rising margin and positive comments from recent earnings discussions as “Margin-resilient consumption players”

Consumer-related			>=0 s.d.		B						
Ticker	Name	GICS Industry Group	19-26E EBITDA margin trend	26E EBITDA margin s.d. vs. Avg ^A	Quoted Price	Quote d Ccy	Total listed Mkt Cap (US\$bn)	6M ADVT (US\$mn)	2025-27E EPS CAGR (%)	GS Rating s	Management/GS analysts comments on inflation/margin
Margin-Resilient Consumption Defenders											
000333 CS	Midea	Cons Dur		0	76.4	CNY	83	331	9	B	The company maintained stable core OPM despite commodity price increase in 4Q25.
2020 HK	ANTA	Cons Dur		0	80.6	HKD	29	91	10	B	Management confident in winning through products mix shift to high-margin brands and operational efficiency in 2026.
9987 HK	YUM China	Cons Svcs		0.6	385.8	HKD	17	33	13	B*	Mgmt expects modest OPM expansion, with relatively stable raw material price and operational efficiency gains, though partly offset by higher rider cost driven by rising delivery mix, especially in 1H26.
605499 CG	Eastroc Beverage	Food Bev		1.1	202.3	CNY	15	74	20	B*	Full-year PET cost lock-ins through 3Q26 provide a buffer compared to the 2022 spot-price exposure.
291 HK	CR Beer	Food Bev		2.5	26.2	HKD	11	35	41	B	Management reiterated a moderate, manageable slight increase in unit COGS in 2026 with locked-in mild barley/rice benefits
168 HK	Tsingtao Brewery	Food Bev		0.8	50.9	HKD	11	21	9	B	Management views aluminum cans cost pressure as limited and noted the possibility of adjusting the mix toward bottled products to mitigate the impact.
1768 HK	Busy Ming	Stpl Retail		2.2	382.0	HKD	11	22	34	B	Strong pricing power in the F&B retail market; potential beneficiary in an inflation pick-up scenario.
1364 HK	Guming	Cons Svcs		0.4	28.7	HKD	9	19	27	B*	Mgmt expects GPM to be stable, considering diversified raw material and limited additional franchisee support is needed with healthy franchisee UE.
2319 HK	Mengniu	Food Bev		3.7	17.6	HKD	9	44	64	B	PET exposure is low-teens % of COGS. Raw milk prices expected to see a stable/upward trend in 2026.
2648 HK	Anjoy Foods	Food Bev		1.3	80.7	HKD	5	5	17	B	Easier competition from 2H25 and Company's scale of economies helped strong margin expansion from 4Q25, and GS expects continued trend into 2026.
002847 CS	Yankershop Food	Food Bev		1.5	58.4	CNY	2	28	21	B	Management believes 2026 raw-material costs should remain broadly steady as they have locked in core inputs for the full year, and dropping konjac cost would help better product margins.
1579 HK	Yihai Int'l	Food Bev		0.2	16.8	HKD	2	7	11	B	Management views PET/soybean oil inflation as manageable; 2026 GPM will reflect benefits from 2H25 price hike and operating leverage from sales acceleration.

Notes: ^A26E EBITDA margin standard deviation vs. 19-15 average level; Prices as of Apr 3; Valuation items are I/B/E/S consensus. GS Ratings are views of sector analysts: B=Buy; *B* indicates on APAC Conviction List

Appendix

Earnings revisions gathering momentum

We highlight a notable shift in consensus 2026E EPS growth estimate, which has been revised upward to 23% yoy, compared to 16% in February. This momentum is primarily attributable to two factors:

1. Upstream Strength: Significant upward revisions within the Energy, Metals, and Chemicals sectors provided tailwinds to aggregate index earnings, even though property and consumer sectors have somewhat offset these gains.
2. Lower 2025 Base: The 2025 earnings base has settled lower than previously anticipated, dropping by 3% over the past month.

Despite these changes, we keep our current estimates of 8%/12% EPS growth for CSI300 in 2025/26E for now. Since the A-share annual reporting season is only halfway through, these figures remain subject to further volatility as more data becomes available. We plan to conduct a comprehensive reassessment of our fundamental numbers after the reporting cycle concludes at the end of April.

图表 19: Upward revisions in 2026E EPS for upstream sectors and on a lower-than-expected earnings base in 2025 since the Middle East conflict

以下为额外要求的披露：股权及重大利益冲突：高盛的政策为禁止其分析师、分析师属下专业人员及其家庭成员持有分析师负责研究的任何公司的证券。分析师薪酬：分析师薪酬部分取决于高盛的盈利，其中包括投资银行的收入。分析师担任高级职员或董事：高盛的政策通常禁止其分析师、分析师属下人员及其家庭成员担任分析师负责研究的任何公司的高级职员、董事或顾问。非美国分析师：非美国分析师可能与高盛无关联，因此可以不受FINRA 2241条FINRA 2242条对于与所研究公司的交流、公开露面及交易分析师所研究证券的限制。

美国以外司法管辖区规定的额外披露

以下为除了根据美国法律法规规定作出的上述信息披露之外其他司法管辖区法律所要求的披露。澳大利亚：Goldman Sachs Australia Pty Ltd及其相关机构不是澳大利亚经授权的存款机构（1959年《银行法》所定义），因此不在澳大利亚境内提供银行服务，也不经营银行业务。本研究报告或本报告的其他形式内容只可分发给根据澳大利亚公司法定义的“批发客户”，在事先获得高盛许可的情况下可以有例外。在撰写研究报告期间，Goldman Sachs Australia全球投资研究部的职员可能参与本研究报告中所讨论证券的发行公司或其他实体组织的现场调研或会议。在某些情况下，如果视具体情形Goldman Sachs Australia认为恰当或合理，此类调研或会议的成本可能部分或全部由该证券发行人承担。如本报告内容包含任何金融产品建议，则该建议仅为一般建议，且高盛提出该建议时并未考虑客户的目标、财务状况或需求。客户在就此类建议采取行动之前，应结合其自身目标、财务状况和需求来考虑该建议的适当性。高盛澳大利亚和新西兰的利益披露，以及高盛澳大利亚卖方研究独立性制度声明请参见<https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>。巴西：与CVM Resolution n. 20相关的信息披露请参阅<https://www.gs.com/worldwide/brazil/area/gir/index.html>。根据CVM Resolution n. 20第20条，在适用的情况下，对本研究报告内容负主要责任的巴西注册分析师为本报告开头部分标明的第一作者，除非报告末另有说明。加拿大：这些信息仅供您参考，在任何情况下都不应被理解为Goldman Sachs & Co. LLC对加拿大证券购买者进行有关任何加拿大证券交易的广告、要约或征求行为。Goldman Sachs & Co. LLC未在适用的加拿大证券法规下注册为任何加拿大司法管辖区内的交易商，通常不被允许交易加拿大证券，并且可能被禁止在加拿大某些司法管辖区内销售某些证券和产品。若您想在加拿大交易任何加拿大证券或其他产品，请联系 Goldman Sachs Canada Inc. (高盛集团的关联机构) 或其他已注册的加拿大交易商。香港：可从高盛（亚洲）有限责任公司获取有关本报告中研究公司的证券的额外资料。印度：可从高盛（印度）证券私人有限公司（分析师 - 印度证券交易委员会(SEBI) 编号 INH000001493，地址10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, 公司编号 U74140MH2006FTC160634, 电话 +91 22 6616 9000, 传真 +91 22 6616 9001) 获取有关本报告中研究对象或所提及公司的额外资料。高盛可能持有本报告中研究对象或所提及公司的证券（1956年印度《证券合同(管理)法》条款2(h)之定义）的1%或更高比例。证券市场投资会受到市场风险的影响。请在投资之前仔细阅读所有相关文件。在SEBI注册并已获得NISM认证并非对该中间机构表现的担保，亦不能对投资者回报做出保障。高盛（印度）证券私人有限公司投资者支持部门联系方式请参见<https://www.goldmansachs.com/worldwide/india/documents/Grievance-Redressal-and-Escalation-Matrix.pdf>，点击此链接<https://publishing.gs.com/content/site/india-annual-compliance-report.html>可获得年度审计合规报告副本。日本：见下文。韩国：除非高盛另行同意，本报告无论以何种方式取得，仅供《金融服务与资本市场法》定义的“专业投资者”使用。可从高盛（亚洲）有限责任公司首尔分公司获取有关本研究所研究公司的额外资料。新西兰：Goldman Sachs New Zealand Limited及其关联机构并非1989年新西兰储备银行法定义的“注册银行”或“存款机构”。本研究报告以及本报告的其他形式内容只可分发给2008年财务顾问法案定义的“批发客户”，在事先获得高盛许可的情况下可以有例外。高盛澳大利亚和新西兰的利益披露请参见<https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>。俄罗斯：在俄罗斯联邦分发的研究报告并非俄罗斯法律所定义的广告，而是不以产品推广为主要目的的信息和分析，也不属于俄罗斯法律所界定的评估行为。研究报告不构成俄罗斯法律规定的个性化投资建议，并非针对某个具体客户，在报告准备阶段也未分析客户的财务状况、投资特征或风险特征。高盛不对某个客户或任何其他人士基于本报告可能做出的任何投资决策承担责任。新加坡：高盛（新加坡）私人公司（公司编号：198602165W）（受新加坡金融管理局监管）为本研究报告承担法律责任，若有由本研究报告所引发或与本研究报告相关的任何事宜，请联系高盛（新加坡）私人公司。台湾：本信息仅供参考，未经允许不得翻印。投资者应当谨慎考虑他们自身的投资风险，投资结果由投资者自行负责。英国：在英国根据金融市场行为监管局的定义可被分类为私人客户的人士参阅本报告的同时应当参阅高盛以往对本报告研究企业的研究报告，并应当参考高盛国际已经发给这些客户的风险警告资料。该风险警告资料复本，以及

本报告中采用部分金融辞汇的解释可向高盛国际索取。

欧盟和英国: 与欧盟委员会实施条例 (EU) (2016/958) (欧盟议会和欧盟理事会条例(EU) No 596/2014的补充条款,规定了有关投资建议或其他投资策略的推荐或建议之信息的客观陈述,以及对特定利益或利益冲突进行披露的技术安排应达到的监管技术标准; 英国脱离欧盟和欧洲经济区之后该实施条例被纳入英国国内法律法规) 第6(2)条相关的披露信息可在<https://www.gs.com/disclosures/europeanpolicy.html>上获取, 该网址介绍在处理和投资研究有关的利益冲突时应参照的欧洲政策。

日本: 高盛证券株式会社是在关东财务局注册(注册号: No. 69)的金融工具交易商, 同时也是日本证券业协会日本金融期货业协会、第二类金融工具公司协会、日本投资信托协会以及日本投资顾问协会的成员。关于日本证券交易所、日本证券交易商协会或日本证券金融公司所要求的适用的信息披露, 请参见与公司有关的法定披露部分。

高盛国际(由审慎监管局授权并接受金融市场行为监管局和审慎监管局的监管)已批准本研究报告在英国分发。

欧洲经济区: Goldman Sachs Bank Europe SE是一家在德国注册成立的信贷机构, 在单一监管机制下接受欧洲央行的直接审慎监督, 在其他方面接受德国联邦金融监管局(Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin)和德国联邦银行的监督, 由该机构向欧洲经济区内分发研究报告。

一般性披露

本研究报告仅供我们的客户使用。除了与高盛相关的披露, 本研究报告是基于我们认为可靠的目前已公开的信息, 但我们不保证该信息的准确性和完整性, 客户也不应该依赖该信息是准确和完整的。报告中的信息、观点、估算和预测均截至报告的发表日, 且可能在不事先通知的情况下进行调整。我们会适时地更新我们的研究, 但各种规定可能会阻止我们这样做。除了一些定期出版的行业报告之外, 绝大多数报告是在分析师认为适当的时候不定期地出版。

高盛是一家集投资银行、投资管理和证券经纪业务于一身的全球性综合服务公司。全球投资研究部所研究的大部分公司与我们保持着投资银行业务和其它业务关系。美国证券经纪交易商高盛是SIPC(<https://www.sipc.org>)的成员。

我们的销售人员、交易员和其它专业人员可能会向我们的客户及自营交易部提供与本研究报告中的观点截然相反的口头或书面市场评论或交易策略。我们的资产管理部门、自营交易部和投资业务部可能会做出与本报告的提议或表达的意见不一致的投资决策。

我公司及其关联机构、高级职员、董事和雇员, 除法规及高盛的制度所禁止的情况外, 将不时地对本研究报告所涉及的证券或衍生工具持有多头或空头头寸, 担任上述证券或衍生工具的交易对手, 或买卖上述证券或衍生工具。

在高盛组织的会议上的第三方演讲嘉宾(包括高盛其它部门人员)的观点不一定反映全球投资研究部的观点, 也并非高盛的正式观点。

在此提到的任何第三方, 包括销售人员、交易员和其它专业人士或其家庭成员, 可能持有本报告提及的且与本报告分析师所表达的观点不一致的产品头寸。

本报告重点关注整体市场、行业以及板块的投资主题, 而无意区分任何我们所描述的行业或板块中具体公司的前景或表现、或对此进行分析。

本报告中与行业或板块内一只或多只股票或信贷证券相关的交易建议是对所讨论投资主题的反映, 而并非对该证券的孤立的交易建议。

在任何要约出售股票或征求购买股票要约的行为为非法的司法管辖区内, 本报告不构成该等出售要约或征求购买要约。本报告不构成个人投资建议, 也没有考虑到个别客户特殊的投资目标、财务状况或需求。客户应考虑本报告中的任何意见或建议是否符合其特定状况, 以及(若有必要)寻求专家的意见, 包括税务意见。本报告中提及的投资价格和价值以及这些投资带来的收入可能会波动。过去的表现并不代表未来的表现, 未来的回报也无法保证, 投资者可能会损失本金。外汇汇率波动有可能对某些投资的价值或价格或来自这一投资的收入产生不良影响。

某些交易, 包括牵涉期货、期权和其它衍生工具的交易, 有很大的风险, 因此并不适合所有投资者。投资者可以向高盛销售代表取得或通过<https://www.theocc.com/about/publications/character-risks.jsp>和https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures取得当前期权和期货的披露文件。对于包含多重期权买卖的期权策略结构产品, 例如, 期权差价结构产品, 其交易成本可能较高。与交易相关的文件将根据要求提供。

全球投资研究部提供的不同服务层级: 根据您对接收沟通信息的频率和方式的个人偏好、您的风险承受能力、投资重心和视角(例如整体市场、具体行业、长线、短线)、您与高盛的整体客户关系的规模和范围、以及法律法规限制等各种因素, 高盛全球投资研究部向您提供的服务层级和类型可能与高盛提供给内部和其他外部客户的服务层级和类型有所不同。例如, 某些客户可能要求在关于某个证券的研究报告发表之时收到通知, 某些客户可能要求我们将内部客户网上提供的分析师基本面分析背后的某些具体数据通过数据流或其它途径以电子方式发送给他们。分析师基本面研究观点(如股票评级、目标价格或盈利预测大幅调整)的改变, 在被纳入研究报告、并通过电子形式发表在内部客户网上或通过其它必要方式向有权接收此类研究报告的所有客户大范围发布之前, 不得向任何客户透露。

所有研究报告均以电子出版物的形式刊登在我们的内部客户网上并向所有客户同步提供。并非所有研究内容都转发给我们的客户或者向第三方整合者提供, 高盛也并不对由第三方整合者转发的我们研究报告承担任何责任。如需了解可向您提供的有关一个或多个证券、市场或资产类别的研究报告、模型或其它数据(包括相关服务), 请联络您的高盛销售代表或登陆<https://research.gs.com>。

披露信息可以查阅<https://www.gs.com/research/hedge.html>或向研究合规部索取, 地址是200 West Street, New York, NY 10282。
